

PROVIDENCE

SOUTH RIPLEY

Georeferenced PDF Maps – Setup Instructions

1. Download the PDF Maps app to your smart device.
 - a. Click on the image below
 - b. Go to the PDF Maps website - <http://www.avenza.com/pdf-maps>
 - c. Search 'PDF Maps' in your App Store

2. Download the Georeferenced PDF Map from the Resources page of ProvidenceRipley.com.au/resources/pdf-maps
3. Import the SUCE map into the PDF Maps app. This can be imported via your device if connected to a computer or one of the easiest ways to do this is to save the file into a dropbox folder and the file can be imported from Dropbox within the app.
4. When on site, open the app and open the georeferenced PDF. If you are located on the map, it will show your location with a blue circle and you can easily identify where you are on site. The accuracy of the GSP will depend on your device, but it is generally within 5 to 10m from the actual location and sufficient to determine what lot you are located on.

Please contact Emma Foreman at Amex Corporation on (07) 3198 6770 with any queries or questions relating to this app.

Alternatively, our sales staff at Providence have been provided with an iPad which can be borrowed while you are completing lot valuation.
